The graphics in Lightroom are amazing and quite often the program itself doesn't crash. I've just worked on a large batch of pictures from a client and everything ran perfectly. I'm amaze that this can stay up and working. I've tried the software for years now and the launch of this version was a good day. I would recommend this to anyone who is on the fence about buying Lightroom. The new editing features are amazing (such as the new Split Toning tool/etc.). It has a nice interface and overall, I urge anyone on the fence to download it as soon as it's released. This new version of Lightroom is one of the best that has been released. I really like the new editing tools and new Preset manager. I feel like this version is more polished than the previous one. If you have used Photoshop, the incorporation of the Adobe Mobile Suite of applications is not likely to be a major upgrade for you. You can easily switch between the iPad app and the Windows version of Lightroom. In fact, it even has a new feature called "Photoshop Creative Cloud Libraries" that also renders the mystique of Cloud computing a little more tactile, though the latter only works with the iPad app. The fact that it is available on both iOS and PC platforms is clearly an advantage for those who wish to work simultaneously on a desktop and an iPad. I actually wish that it were possible to work directly within Lightroom on the iPad, but perhaps that is a feature I will have to wait for. In the meantime, there is a lot to like about Photoshop's mobile app. Every time I use it I am amazed by how fast it is to do basic image editing, and I can complete even the most complex workflows whenever I travel. Only now do I have to tote around my large MacBook Pro, which I will gladly trade in for an iPad Pro with the new Apple Pencil. I am certainly enjoying the upgrade to iOS 11 on my iPad, having embraced some of the apps on the Apple tablet long ago. Digital photography on the iPad definitely rocks when it comes to speed and workflow. It has much more potential than it has time to realize yet.
